REMARKS

25X1

1. The landing field of Jueterbog-Damm (N 52/E 68) was not serviceable. It was covered with sand and contained many holes and trenches. \* No aircraft were stationed at the field. About 200 soldiers with red-bordered, black epaulets underwent infantry training on the landing field with four to six heavy mortars. Several air force soldiers were seen between the barracks buildings.

\*\*

25X1

2. Eighteen unoccupied passenger cars were standing on the railroad spur track. The aircraft wrecks which previously lay on the loading ramp had been removed.

\* ☐ Comment. There are no indications of intended reconditioning at the landing field. The airfield is apparently not scheduled to be occupied by air units.

\*\* ☐ Comment. ☐ the airfield barracks buildings are occupied by units of the 14th Gds Mecz Div. The report does not indicate whether air force units are also stationed at the field. To date an air force repair unit for the maintenance of radio sets was believed to be quartered in the hangars.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
